

Sneha Chandravanshi

Full Stack Developer | Data Analyst | AIML Engineer
chandravanshisneha102@gmail.com | +91 7724905769 | LinkedIn | GitHub | Portfolio

Technical Skills

Languages: Java, Python, C++, JavaScript, HTML, CSS, SQL
Full Stack: React, Node.js, Express.js, Django, Flask, Tailwind CSS, Typescript, REST APIs
Databases: PostgreSQL, MySQL, MongoDB
AI & ML: NumPy, Pandas, Scikit-learn, TensorFlow, Seaborn, Pytorch, Exploratory Data Analysis (EDA)
Tools: Git, GitHub, Docker, Postman, Jupyter Notebook, Apache Spark, Hugging face, Notion
Cloud & DevOps: AWS (EC2, S3, Lambda, SQS, SNS, CloudFront), CI/CD
Core CS: Data Structures & Algorithms, Computer Networks, DBMS, Operating System, Distributed Systems

Education

Integrated M.Tech in Artificial Intelligence 2022 – 2027
Vellore Institute of Technology CGPA: 8.44/10
Class XII (93.2%, 2022) | Class X (95.3%, 2020)

Professional Experience

MERN Full Stack Developer Intern (AI Program) Nov 2025 – Dec 2025
Ethnus – Remote

- Contributed to full software development lifecycle across 5+ MERN applications.
- Developed 15+ REST APIs and performed API testing using Postman, improving response time by 25%.
- Worked with cross-functional teams to build scalable backend systems and reusable components, reducing redundancy by 30%.
- Assisted in debugging and resolving software defects, improving system reliability and performance.

Projects

SkillAI (AI-Powered Personalized Learning Platform) | Live 2026
React.js, Node.js, Express.js, MongoDB, TailwindCSS, Groq API, JWT

- Designed and developed a scalable full-stack application following SDLC principles, generating 100+ personalized learning roadmaps.
- Built and tested 20+ REST APIs with optimized database queries, improving response latency by 25% .
- Implemented modular backend architecture enabling CI/CD integration and easier deployment.

EchoAI (Conversational Voice Agent) 2025
Python, Mistral LLM (Ollama), ElevenLabs API, VADER Sentiment, Google Speech Recognition

- Developed an end-to-end AI-based voice system integrating speech recognition, sentiment analysis, and LLM inference.
- Identified and resolved system bottlenecks, reducing latency to < 8 seconds and improving reliability through fallback mechanisms.
- Improved system robustness through structured error handling and modular pipeline design.

Nutrivista (Health-Focused Food Platform) | Live 2025
HTML, CSS, React.js, SQL, Python, Flask, Dialogflow

- Built a full-stack platform with a chatbot automating 85% of queries, reducing response time to < 5 seconds and increasing conversion by 22%.
- Designed a backend system managing 50+ food items and handling 100+ user interactions/day with secure authentication and database operations.
- Improved backend reliability and request handling through optimized database queries and structured API design .

Research & Publications

- A Comparative Benchmarking Study of Classical Machine Learning and Deep Learning Methods for Image-Based Deepfake Detection (Published) Apr 2026
- Prakriti Parakh: A Chatbot for Identifying Individual Prakriti Aug 2025

Certifications

- Oracle Certified AI Foundations Associate Oct 2025
- Oracle Certified Generative AI Professional Oct 2025
- HackerRank Certified Advanced SQL March 2024
- Artificial Intelligence Foundations: Thinking Machines May 2023
- Applied Machine Learning in Python Dec 2023

Achievements

- Ranked among the top 323 teams (top 0.7%) out of 43,956 in a HP Power Lab 2.0 hackathon, qualifying for the second round.
- Top 6.7% Finalist at EY Techathon 5.0
- Finalist – Top 50 out of 350+ Teams – The Food Hackathon CSIR-CFTRI, Mysuru
- Solved 200+ DSA problems across platforms, strengthening algorithmic thinking and optimization skills.
- Achieved 5-Star SQL rating on HackerRank by consistently solving advanced database and query problems.
